Welcome to our 2016 Annual Report

Since our inception, we have supported over 250 programmes, disbursing around USD 48 million.

As we look to the coming years, we want to achieve even greater impact. That's why, in 2016, we decided to transition to a new programming strategy which will commence in 2017. We believe this shift in focus will bring about even greater, sustainable change to even more beneficiaries.

Since its establishment in 2007, the Foundation has continually engaged in the areas of education, sustainable development and health, offering funding and technical guidance to many charitable partners around the world. The results have been compelling: **in 2016 alone, close to USD 5 million was spent on philanthropy over 46 partners across 33 countries.**

Our work takes place in the heart of the local societies and economies in which Trafigura, our founding company, operates. For example, in Africa, we partner with the organisation IECD to teach rural entrepreneurs food-processing techniques that help them contribute to the growth of local agro-processing units. This experience typically enables young farmers to access new markets and obtain promising jobs. In the Palestinian Territories, we have partnered with the Cherie Blair Foundation for Women, which supports over 200 women entrepreneurs with financial assistance, training and one-to-one incubation services to boost their business. In Argentina, we teamed-up with Cascos Verdes, which trains young people with Down's Syndrome to become "environmental educators". This programme offers an innovative way to raise awareness about environmental issues and helps people with disabilities enter the job market.

Here we have mentioned just a few of the programmes that the Foundation supported this year. They are only partially representative of the wide-ranging and meticulous work we have undertaken so far. Over time, it became clear that the most

impactful and meaningful of our programmes were those that provided a creative solution to local socio-economic issues which laid the foundation for autonomous, long-lasting capacity building. It was by looking back at our best and most impactful successes that we identified new focus areas for the Trafigura Foundation and defined new strategic targets. Going forward, our strategic plan is characterized by a sharper focus on activities that are more closely aligned to the industry in which our parent company operates. Our emphasis will be on social entrepreneurship, as a way to boost local economies and promote sustainable employment, and safe and clean logistics. By reformulating the vision of the Trafigura Foundation based on these drivers, we can bring about a dual-benefit of more resources to programmes that have the most impact over the long-term, as well as matching more closely the principles underpinning our new strategic philanthropy.

A final remark goes to the tireless activities and endorsement of Trafigura employees around the world who make philanthropy a living, breathing part of our corporate culture. These employees group themselves into local Charity Committees and have one ear to the ground in their communities. They diligently identify and address urgent issues in and around their office, and enthusiastically engage in charitable activities to help. We invite you to discover their endeavours on page 4 and 5 and we are confident you will be, just like us, impressed by the many ways in which our corporate colleagues helped out this year.

*Graham Sharp
Chairman*

*Vincent Faber
Executive Director*

2016 at a Glance

In 2016, the Foundation's philanthropic initiatives reached out 33 countries and boosted 54 programmes, disbursing a total of USD 4.9 million. Our achievements were possible thanks to the expertise of our partners and the invaluable engagement of Trafigura employees around the world.

SPOTLIGHT ON NORTH STAR ALLIANCE

Tanzania

With a focus on improving health conditions of mobile workers and the communities they interact with, in 2016 North Star Alliance officially launched six clinics in Tanzania. Find out more on page 11.

SPOTLIGHT ON THE SOCIAL ENTREPRENEURS OF UNLTD INDIA

India

A launch pad for social entrepreneurs, UnLtd India supports young entrepreneurs who can solve some of India's most urgent problems with innovative business solutions. Find out more on page 13.

SPOTLIGHT ON MOAS

Malta

Migrant Offshore Aid Station (MOAS) continues to save lives along the world's deadliest migration routes. In 2016, the MOAS crews rescued and assisted over 20,000 people fleeing violence, poverty and persecution who were in distress at sea. Find out more on page 24.

OUR CHARITY COMMITTEES

Trafigura employees are active in Charity Committees around 12 offices. We encourage their participation to charitable activities through our matching funds' scheme and "Charity of the Year" initiative.

By grouping themselves into local Charity Committees, Trafigura employees give back to local communities and promote philanthropy as a corporate value. They are active in Athens, London, Geneva, Lima, Mumbai, Johannesburg, Singapore, Houston, Stamford, Montevideo, Shanghai and Bogotá.

A culture of giving

In addition to supporting programmes around the world, the philanthropic spirit of the Trafigura Foundation extends to Trafigura employees, too. Employees volunteer time and funds and organise themselves into Charity Committees, in each local office. These Charity Committees give back to their local communities and are wonderful examples of our corporate values in action.

All money raised is matched

To support the charitable endeavours of employees, the Foundation doubles the money they raise via our "matching funds" scheme. We also provide financial support to "Charities of the Year" elected by local staff.

The Johannesburg Charity Committee this year supported the Little Rose Centre

The Athens Charity Committee has achieved a fundraising initiative for SOS Children's Village to buy equipment for the abandoned babies left at public maternity hospitals

The Charity Committees in action in 2016

- In **Athens**, employees help at the SOS Children's Village for orphans and homeless kids. At the beginning of 2017, children moved to a new babies home thanks to the generosity of the Greek staff.
- **Geneva** helped the association Carrefour Rue for homeless people, organised fundraising events (marathons, cycling tours and regattas), cooked Sunday lunches for disadvantaged people and collected goods for local charities.
- The **Montevideo** Committee supported the Association Civil Providencia, which helps kids living in poverty gain a better education.
- **Johannesburg** helped the Little Rose Centre to build an educational centre by transforming containers into living spaces.
- **Singapore** supported MINDS, an association that helps people with disabilities.
- **Houston** raised money for the Ronald McDonald House that helps families with sick children.
- The **Shanghai** Committee fundraised to refurbish the Caiping School, located in the rural and poor area around Yibin City.

Charity Committee in the Spotlight: Mumbai

2016 was an exceptional year of philanthropic activities for the Mumbai Charity Committee, which saw Trafigura's staff in India support disaster relief, mentor social entrepreneurs, fundraise for children with special needs, start a micro-credit project and address India's urgent social problems in many other initiatives.

In 2016, the Mumbai office raised USD 77,800 – a sum that helped make a real difference in many parts of India.

Among the compelling projects supported this year by our Mumbai colleagues, two initiatives deserve attention for their specific aim of addressing socio-economic problems in an innovative way, while leveraging the business skills of the local staff.

The Mumbai Charity Committee provided invaluable support to one of the Trafigura Foundation's partner organisations, the launch pad for social entrepreneurs called UnLtd India (see focus story on page 13). Managers from Trafigura's office in Mumbai are mentoring some of these projects and sharing their business expertise with social entrepreneurs.

Another smart initiative was set up by the Charity Committee to tackle the critical situation affecting the credit system in India. "To support small entrepreneurs and families and prevent them from relying on usurers, we are participating in a micro-credit programme supported by the social platform Rang De," explains Tony Hara, Chairman of the Charity Committee and CEO of Trafigura Global Services. "On this platform, Trafigura employees can see borrowers' profile, what they want to create with the money they borrow, how much money they need and when they will give the money back. This is a project we would like to extend within our office, because it can really make a difference for many families while requiring little effort from employees."

Transforming the prospects of rural entrepreneurs

Thanks to a close collaboration with knowledgeable and resourceful partners, our programmes in Africa are meant to empower local communities. We aim for ambitious but essential objectives: to create sustainable employment, promote a vibrant socio-economic environment via solutions based on local realities, and provide the tools and skills needed to thrive.

IECD (European Institute of Cooperation and Development) –
Cameroon, Ivory Coast

Purpose

IECD launched its dynamic "Transform" programme to incubate entrepreneurs entering the food and juice business in Cameroon and the Ivory Coast. The scheme helps young people set up food processing units and trains rural business people.

In Cameroon, IECD promotes a project focusing on food processing in the fruit industry, with a focus on creating sustainable local jobs and creating wealth in rural areas. At the local Transform Centre, entrepreneurs are helped on their journey to create viable business models in the juice sector. Those on the programme have shown considerable promise: the manager of "Bonga Juice" opened a new juice bar in March 2016 and created 25 full-time jobs. "AfricaBio" also recruited last year and is now a regular supplier of juices to a major local supermarket. One SME at the Transform Centre produced more than 16,600 litres of juice worth USD 30,700 in net sales.

In the town of Tiassalé, a town on the southern Ivory Coast, the same "Transform" project was implemented and 2016 saw the completion of IECD's Transform Agro-Food Centre, which is also home to a business park and business incubator. 10 SMEs started their incubation journey and several farmers began a series of training sessions, focusing on farm management tools, good use

of fertilizers and pesticides, quality control and best practices in pineapple and papaya production. The objective is to assist more producers to become reliable suppliers for local SMEs with better products. In total, 30 beneficiaries will be trained to launch and develop their own food-processing enterprise, six of whom will be fast-tracked through the business park incubator. 100 small agricultural producers will be able to sell their production to food-processing enterprises and 75 young people and women will start simple food-processing income-generating activities.

Key 2016 achievements

Transform in Ivory Coast has the first business incubation course in the country

Entrepreneurs created 33 new jobs, as they expanded their businesses

98 farmers were trained to be reliable suppliers of raw materials

This inclusive programme also trains 74 women in basic agro-food practices, hygiene and management skills

Next-generation farmers

IECD – DRC, Ivory Coast

Purpose

Giving vocational training to youth aged 13-20 in local Family Farm Schools.

This project gives young people in rural communities in West Africa the tools to create and grow enterprises in the countryside. IECD's Family Farm School (FFS) provides youth aged 13-20 with the vocational training they need to succeed. The idea is to integrate these youngsters into the farm work and encourage their analytical skills. There are 14 FFS as well as one Training Institute for Rural Entrepreneurship (IFERA) in the Ivory Coast, and four in the Democratic Republic of the Congo (DRC). To improve access to these quality educational opportunities, one boarding school, 12 other accommodations and four canteens have been developed. In the DRC we're happy to see the construction of the new Kimpemba Family Farm School as well as the renovation of the Ndigingia School. The Trafigura Foundation has been part of this initiative since 2013. So far, more than 3,800 students have completed the training across all 38 Schools. In 2016, 116 FFS trainers were trained across the region to support this programme. Many of the alumni have gone on to develop their own business and almost all have seen an increase in their production and revenues. FFS' partnerships with the cocoa, sugar cane and palm oil industries are also helping to fast-track students into professional opportunities in these sectors.

Key 2016 achievements

423 students were trained (25% were girls) and 15 graduated from the Institute for Rural Entrepreneurship

Township triumphs

FXB International – South Africa

Purpose

Offering youth aged 18-20 a vocational training programme.

FXB is a charity that equips young people from the Johannesburg townships of Soweto and Alexandra with skills and knowledge to help them find a job or become self-employed. The project is entering its third year, and in February 2016 a new batch of 44 ambitious students joined the programme. 35 students have lost one or both of their parents and the other nine beneficiaries have no guardians and must take care of themselves. We're

thrilled that all 44 FXB/Trafigura Vocational Programme beneficiaries passed their courses and are now qualified. 17 Alexandra beneficiaries now have permanent jobs in a debt collection call centre or in a sales company. Two pioneering youth from the Soweto group have started their own t-shirt, caps and mug printing business. Nine Soweto beneficiaries found employment as retail merchandiser, call centre agent, office administrator and shop

assistant, while others are interning in the hope of gaining employment at their companies. Encouragingly, seven youths from Soweto are continuing their studies.

Key 2016 achievements

44 students are newly qualified and many have found employment

Congolese girls get a good education

Malaika School for Girls – DRC

Purpose

Providing a high-quality free education, school supplies, uniforms, art and theatre classes, two healthy meals a day and physical activities to girls.

The Malaika School for Girls is seeking funds to continue its expansion by building three new classrooms. Located in Kalebuka village in Katanga Province, the current enrolment for the school stands at 252 girls. The school has been incredibly active this past year. One change is that Malaika School is now powered by solar energy. Thanks to this innovation, the sustainability of the school reached a whole

new level, as it no longer needs to depend on unreliable electricity or an expensive generator. This stable source of energy has allowed them to set up a computer room, giving the girls an opportunity to connect with the modern world. In March 2016, a library was inaugurated, which has books in French and English, in both print and digital format on tablets. In addition, two more wells were drilled and at the community centre, 7,000 insecticide-treated nets were given to the village as part of the Drop Malaria programme.

Key 2016 achievements

Installation of solar power and a new state-of-the-art e-library

Sight for millions by training thousands

HelpMeSee – Angola, Gambia, Guinea, Madagascar, Mali, Senegal, Myanmar, India

Purpose

Treating cataracts before they lead to blindness, aiding the sight-impaired.

This project aims to make it possible for local surgeons to save or restore the sight of more than 38,000 children and adults in Africa and Myanmar. During 2014-2020, the organisation HelpMeSee expects to train 1,000 surgeons and deliver 4.9 to 5 million surgeries. HelpMeSee has developed a single-use, disposable surgical kit and 10,000 new kits were produced and distributed in the countries they operate in. Owing to Trafigura Foundation's assistance, HelpMeSee has expanded its campaign into three new countries – Madagascar, Gambia and Myanmar. There have been huge efforts to provide skills and training. In Madagascar, ophthalmologists were trained in Manual Small Incision Cataract

Surgery (MSICS). In Gambia, surgeons were given refresher training. In Myanmar, HelpMeSee provided training to hospital staff in eye care. Meanwhile, India saw the launch of a state-of-the-art cataract surgical facility in the town of Alibag, Maharashtra. The facility has performed surgeries with Trafigura Foundation's financial support. In India, Madagascar, Myanmar and Gambia, 130 Community Health Workers were trained on screening communities and recording patient information through apps.

Key 2016 achievements

7,950 surgeries were completed in Madagascar, Gambia, Myanmar and India; hundreds more are in the pipeline

Rat them out

APOPO – Angola

Purpose

Clearing the threat of landmines and re-purposing land after conflict.

The Trafigura Foundation is supporting APOPO's ingenious mine action project, which uses African Giant Rats to detect landmines in former war zones. Phase one (2012-2015) achieved its goal to have no confirmed hazardous areas in the Malanje province, Angola, releasing 1,800,000 m² for farming and benefiting almost 115,000 people. Phase two aims to replicate these excellent results in the Zaire Province. It started in September 2015, in northwest Angola, where 27 mine detection rats are on site "accredited and ready for operations."

The rat handlers have been identified and trained and the mine detection rat teams are said to be on top form, getting solid results. The Geneva International Centre for Humanitarian Demining has even used Angola as a case study. APOPO's work in 2016 is said to have directly benefitted 6,741 people. Their work is vital in these landmine-affected areas where people live off farming but lack safe access to land for agriculture, housing and infrastructure. Villages are expanding and local communities need more land. APOPO's furry friends, the

manual de-miners, together with the demining machine for ground preparation, are gradually making Angola a safe place to live again.

Key 2016 achievements

Apopo cleared about 163,000 m² of land safe for productive use; it also identified and destroyed 320 hazardous items

Healthy highways

North Star Alliance , Tanzania

Purpose

Providing roadside clinics to the mobile trucking community since 2006.

The mission of North Star Alliance is to bring quality and sustainable health services to hard-to-reach populations, including the mobile truck driving community across Africa. The organisation has turned 10 years old, marking its maturity from an idea shared by a small group of people, to a multinational and recognised pioneer in the field.

We support North Star Alliance's famous "Blue Box" clinics: handy roadside wellness centres fashioned from old shipping containers. These clinics specifically treat the special health issues of the trucking community, are now extending their reach to local communities, who have little or no access to medical services.

The clinics are found across Sub-Saharan Africa and deliver vital public health programmes for people with increased health risks, such as truck drivers and sex workers. Health services on offer include screening for HIV, health checks and counselling as well as training for drivers to increase road safety. Other illnesses such as malaria, tuberculosis and sexually transmitted infections are also tackled.

In the last 10 years, North Star Alliance has grown from operating one Blue Box clinic to 38 Blue Box clinics across 10 countries in Africa. 11 of the clinics are now accredited to initiate HIV patients onto antiretroviral therapy (ART).

In 2016, a big step forward was the official launch of six clinics along the main logistical corridor in Tanzania. This was achieved with the commitment of the Trafigura Foundation and the Puma Energy Foundation, which also supports this cause.

The six clinics in Tanzania provide essential health services and road safety modules to truck drivers and members of local communities.

North Star Alliance's Executive Director, Ylse van der Schoot says: "In addition to our comprehensive healthcare package, this model offers truck drivers essential road safety modules, paving the way to safer roadways. The support given by the Trafigura and Puma Energy Foundations results in more people having access to one of the most basic of human rights: health."

Key 2016 achievements

Six new clinics in Tanzania registered 26,787 visits, of which 56% were made by truck drivers and the other visits were made by community members

The total number of services provided in 2016 was 33,458

No limits to ideas at UnLtd India

“Our partnership with the Trafigura Foundation has been critical in helping us support some remarkable leaders who are developing high-impact solutions for under-served communities in India. In addition to the grant, what we have found most valuable is the frequent time, strategic inputs and the support given by the Trafigura team.” – Pooja Warier, Co-founder and CEO, UnLtd India.

UnLtd India – India

Purpose

Supporting early-stage social entrepreneurs.

In 2016, Trafigura Foundation began supporting UnLtd India, a launch pad for entrepreneurs and changemakers who are creating radically innovative solutions to India's social problems.

The Foundation is funding nine social entrepreneurs and employees from the Mumbai Office are getting involved with mentoring and networking for the young businessmen and women. “Our partnership with the Trafigura Foundation has been critical in helping us support some remarkable leaders developing high-impact solutions for under-served communities in India” says Pooja Warier, Co-founder and CEO of UnLtd India. “In addition to the grant, what we have found most valuable is the frequent time, strategic inputs and the support given by the Trafigura team.”

Snapshots of some of the projects incubated by UnLtd India

- **Sustainable Agro International (SAI)**
SAI helps small farmers set up an agro forestry model with the aim of planting trees that can be used as raw material for paper mills. SAI also provides techniques for inter-cropping to help with food security.

- **Asya**

Asya's vision is to provide sustainable livelihoods to crafts-women in Uttar Pradesh (UP), North India to preserve the quality and intricacy of chikankari (a craft involving thread work). Over the last four years, Asya has trained around 200 women and provides regular work to 30 women.

- **Paaduks**

Paaduks tackles waste management by upcycling used tyres into soles for shoes and providing an income to the cobbler community in Bombay. Last year, Paaduks sold 2,000 pairs of footwear and upcycled 700 kilos of rubber.

- **Urja Trust**

Urja Trust works with vulnerable young women, either homeless or runaways to help them reintegrate into the society. Urja runs a night shelter and a day care programme and to date has helped 250 women.

Key 2016 achievements

The nine entrepreneurial projects reached 8,096 beneficiaries and created 1,256 jobs

Bringing water and health to slums in Bangladesh...

Eau et Vie – Bangladesh

Purpose

Ensuring a sustainable access to running water and improving families' sanitary conditions in Bhashantek slums.

In 2010 Eau et Vie created in Bangladesh two partners: the NGO Water & Life Bangladesh (that deals with firefighting, hygiene promotion and sanitation) and the social enterprise Shobar Jonno Pani (which manages water supply and waste management). Over the years, teams of volunteer firefighters have been trained and more than 1,700 people have been educated on improved hygiene practices. Improved waste management has been implemented, with almost 500 families benefitting from a waste collection service. These are the things we take for granted in the western world, but they are making a huge difference to low income communities in depressed urban areas of Bangladesh. The project aims to reach 15,000 people.

Key 2016 achievements

1,734 families received access to water at home

83 firefighters trained

... and to impoverished areas of Cebu and Cavite, Philippines

Eau et Vie – Philippines

Purpose

Improving the living conditions of Cebu and Cavite slums' families through a comprehensive water and sanitation approach.

In the Philippines, the overall objective of Eau et Vie is to improve living conditions of 7,000 families in low-income

communities of depressed urban areas in Cebu and Cavite through a comprehensive water and sanitation approach. In order to provide sustainable improvements and a positive impact on the beneficiaries, the water supply project is accompanied by a broader approach to sanitation that includes hygiene promotion and solid waste management. This project is highly

successful: in 2016, more than 12,500 people had access to safe water. The first sanitary complex has now been built in Cavite and the water network of Lower Tipolo in Cebu has been improved. In parallel, 167 volunteer firefighters were trained in each slum, and more than 2,994 people were sensitized to good hygiene practices.

Key 2016 achievements

2,642 families connected to water network

2,994 people sensitised to good hygiene practices

Fighting tuberculosis in slums

ATIA – India

Purpose

Empowering local health centres to care for tuberculosis (TB) patients, hold prevention programmes around TB risks.

This TB programme in Mumbai started in 2008 and is run in cooperation with five local associations. By the end of June 2016, the project had achieved significant results. 63 DOTS (Directly Observed Therapy Short) centres were functioning and prevention activities had touched almost six million people. Currently, the cure rate for patients treated in DOTS centres is more than 80%.

With the Trafigura Foundation's contribution, ATIA is controlling TB and local authorities are assuming the responsibility of managing the problem. ATIA's case-detection activities have proven to be a huge success, not only because of their efficiency, but also because they have been taken over by the Mumbai municipality with the support of local funders (Lupin Laboratories). It's a great example of a successful transfer of programme activities to the local authorities.

Key 2016 achievements

4,700 patients were treated, with an 80% success rate

540 doctors referred patients to the scheme

Training in budgeting and borrowing

ATIA – India

Purpose

Promoting socio-economic empowerment and giving families access to healthcare.

Together with its partners, ATIA continues to help small businesses grow, granting loans and providing training. More than 25,300 borrowers were trained in business and family budget planning. More than 10,000 families are members of the health mutual fund (a health insurance scheme that is mandatory for productive loans) and 9,400 families have a savings account.

In 2016, ATIA and the Foundation Social Action Implementation (SAI) continued to provide financial and social services to poor families in the Mumbai suburbs, nudging them to become more autonomous. At the end of 2016, there were 2,033 ongoing micro-entrepreneurs. In addition, SAI disbursed 2,206 productive loans systematically combined with financial and economic education, savings and health micro-insurance services. Moreover, 292 micro-entrepreneurs started an intensive business development training.

Key 2016 achievements

2,033 micro-entrepreneurs supported

2,206 productive loans disbursed, along with financial and economic training

The delta force saving ecosystems

Planète Urgence – Indonesia

Purpose

Restoring the ecosystem of the Mahakam delta and supporting income-generation for local communities.

This project, implemented in a partnership between Planète Urgence and Yayasan Mangrove Lestari in Indonesia, concentrates on mangrove reforestation, sustainable aquaculture, crab production and micro-credit funds. The reason for these measures is because of Borneo's dwindling fishing industry,

which has led locals to turn to logging for their livelihood. In 2016, 59,000 trees were made ready for planting. 100 guidebooks on reforestation were reproduced. A model for crab production in inactive ponds was finalised, and a percentage of salaries paid to seed collectors went towards the micro-credit funds. Training and awareness-raising sessions on climate change were delivered to 1,108 people. Through the micro-credit programme, 924 people have been supported.

Key achievements

Since 2014, thousands of people have benefitted from the project and 200,000 mangrove trees have been planted

A school on the up

HBI (Haligi ng Bata) – Philippines

Purpose

Improving health, sanitation, education, and livelihood of local school children and the surrounding fishing community.

A primary school in the community of San Agustin, in San Fernando (La Union) is climbing the rankings, thanks to improved standards and conditions. San Agustin used to be ranked 12 out of the 13 local schools but has jumped to the fifth best. Recently, the focus was on two income-generating programmes for parents at the school. The Fisherman's Programme

and a detergent-making scheme has increased revenues for 125 parents. For the school year 2016-2017, all 790 students were equipped with school supplies. Also, 43 toilets have been constructed, as well as 15 artesian wells. The government of San Fernando hailed the school a Model Community and is offering extra support.

Key 2016 achievements

The total number of beneficiaries is 2,014 (1,200 community members, 790 students and 24 teachers)

Foster care for orphans

Care for Children – China

Purpose

Transforming Nanning into a model of family placement and a training hub.

Care for Children has partnered with the Chinese Government to move children from orphanages into loving families. The objectives are to train 160 family placement workers in Nanning and Guangxi Zhuang region, and place 200 children with local families.

Key 2016 achievements

Two training workshops, "Preparation for Independence" and "Special Education in Foster Care" (addressing access to mainstream education) are on the agenda

Scholarships go a long way

UWCSEA – Singapore

Purpose

Offering full scholarships to unprivileged students.

Since 2008, the Trafigura Foundation has offered full scholarships to students from the region devastated by the 2004 Tsunami, to study at the United World College of South East Asia (UWCSEA). Many of these students have gone on to great academic achievements, and this year's 2016 graduate, Memet Ashari Rahmat, will go on to study Civil Engineering at University College London.

Key 2016 achievements

Eight students were able to pursue their studies at an international level

Better education for children

Teach Future China – China

Purpose

Improving the quality of education in rural areas.

Education in China's countryside is suffering from inadequate methodologies and poorly trained/supported teachers. This project run in the Provinces of Gansu, Inner Mongolia and Yunnan, recruits, trains and supports outstanding university graduates to teach in schools. Last summer, 88 enthusiastic teachers attended a month-long training course in Beijing. Trafigura Foundation sponsored four of these teachers. They've started their promising teaching careers in local high schools and will receive year-long training.

Key 2016 achievements

Four graduates trained to become teachers in schools

Music is the food of love

Lucerne Symphonic Orchestra tour of Asia

Purpose

Connecting this Swiss orchestra with Trafigura's offices in Asia.

In 2016, 62 musicians from Switzerland embarked on a tour of eight concert halls in Asia. The tour led the Lucerne Symphonic Orchestra (LSO) to China, India, and Singapore. They met with several philanthropic organisations endorsed by Trafigura's Charity Committees, including the Cao Peng Musical Fund in Shanghai, which helps autistic children through musical training. The orchestra also met with MINDS (Movement for the Intellectually Disabled of Singapore) and, in Mumbai, LSO ran a workshop with 30 kids from the Muktangan Elphinstone School. These were rewarding experiences for all involved.

Key 2016 achievements

Empowering women to enter the workforce

“The incredible women in this project have achieved success not just for themselves, but for others in their communities. Empowering women to realise their full potential is crucial to creating change in our societies and economies.” – Sofia Olsson, Enterprise Development Programme Manager at the Cherie Blair Foundation for Women.

The Cherie Blair Foundation for Women – Palestinian Territories

Purpose

The Cherie Blair Foundation for Women works in Palestinian Territories to help women enter the job market.

The Cherie Blair Foundation for Women was created in 2008 to help women entrepreneurs in developing and emerging economies overcome socio-economic challenges and empower them to play an important role in their local economies and societies. The ultimate purpose of the programme is to train and coach women entrepreneurs to build businesses which are market-oriented, scalable and which facilitate job creation.

In the Palestinian Territories of Ramallah, Bethlehem and Hebron, the Cherie Blair Foundation for Women is working in partnership with the Near East Foundation to enable female entrepreneurs to grow profitable, sustainable, scalable businesses and create new jobs. As in other countries in the Middle-East and North Africa region, women face enormous social, legal and religious restrictions that hinder their ability to find employment outside of the home or create their own business ventures. Women's participation in the labour force has been below 16% for the last decade, and the Cherie Blair Foundation for Women seeks to turn this number around. The contribution of the Trifigura Foundation has enabled the women to undergo intensive business training and receive one-on-one advice in sectors such as trade, production, embroidery and hand-made crafts.

Key 2016 achievements

The project has reached 217 women, surpassing its target of 200

107 new jobs (both full and part-time roles) have been created by the women in this project

85 women entrepreneurs accessed financial services, including grants and bank loans to develop their products and services

Breaking free from violence

Ana Bella Foundation – Spain

Purpose

Launching an app that helps women escape violence.

Trafigura Foundation is supporting a worthy app which builds a global network of women survivors of abuse that enables hidden victims to break away from destructive relationships. Worldwide, one in three women will have experienced physical or sexual violence in their lifetimes. This equates to 62 million women in Europe alone. Only 14% of abused women in Europe manage to extricate themselves from aggression. The Ana Bella Foundation

believes the best way to help victims is to show them their peers' success stories. Survivors are willing to offer counselling, companionship and give advice on housing and money matters.

A new version of the "We" app is now in development. 321 inspirational survivors have been trained to counsel people through the app. 1,425 abused women, from 18 different countries, have received support thanks to the chat room. Last year, plans were put

in place to replicate the model in Mexico and 23 survivors were trained.

Key 2016 achievements

321 women trained to provide online support to victims

1,425 abused women received support through the online chat

Awarding the protection of women

Womanity Foundation – Worldwide

Purpose

Creating an award to address violence against women.

This year our Foundation supported two organisations, Promundo in Brazil and ABAAD in Lebanon, that received the Womanity Award. The award included financial support for professional services, staff time, learning field visits and impact measurement for three years. Our support helped to replicate in Lebanon the so called "Programme H", that was successfully implemented by the organisation Promundo in Brazil with the aim

of promoting gender equality. A Programme H manual is to be printed and the curriculum was tailored to the Lebanese cultural context (and renamed Programme RA –for "rajol" meaning "young man"). At the launch ceremony of Programme RA, 200 people attended, including 18 media representatives. Social media posts related to the event reached 168,238 people.

Bracelets, necklaces and t-shirts were produced to urge more young people to take part in the programme. During November's international initiative, 16 days of activism against gender-based violence, a week-long campaign on engaging men

led to an online discussion and a live webinar lined up a panel from ABAAD, Promundo US and Rede HOPEM (Men for Change, Mozambique).

Key 2016 achievements

Successful transfer of know-how and project's model from a consolidated organisation (Promundo) to a growing and thriving organisation (ABAAD) to promote gender equality

Communities pull together

ACAF – Spain

Purpose

Self-Funded Communities (SFCs) put money in a co-managed pot and use that fund to provide loans to community members who cannot access credit in other forms.

Trafigura Foundation is a proud sponsor of ACAF's brilliant project that gives people on low incomes the tools to thrive autonomously. In 2016, ACAF created 13 SFCs around the world, including seven in Spain, among which the CAF Cortegana, the first SFC in Huelva. This represents 160 new direct beneficiaries and 480 indirect beneficiaries.

Thanks to the support of the Foundation, since 2014 ACAF was able to create 23 SFCs, which have increased their common funds by more than USD 22,000 during 2016 and have rotated about USD 30,000 last year through around 140 loans given to their members.

Key 2016 achievements

Creation of 23 Self-Funded Communities

Changemakers leading the way

Ashoka – Switzerland

Purpose

Building a community of "changemakers" in Switzerland around entrepreneurial ventures.

Ashoka's vision is to create a world where "Everyone is a changemaker". It is the largest network of social entrepreneurs worldwide, with over 3,300 "Fellows" elected since 1981. In 2016, the Trafigura Foundation supported Ashoka Switzerland by sponsoring the so called "collaboration honours" that were disbursed to three partners (Velafrica, Realise and HappyCityLab) to implement the project "Des vélos qui changent la vie" (bikes which change lives). Second hand bikes were collected in Switzerland and shipped to Africa, with the aim of providing jobs to unemployed people in Switzerland and Africa and promote a sustainable lifestyle.

Key 2016 achievements

Supporting social entrepreneurs' formation and networking through collaboration honours, workshop and trainings

Funding Greek entrepreneurs

ADIE – Greece

Purpose

Fighting against financial and social exclusion of vulnerable people in Athens and its suburbs.

The French Association for the Right to Economic Initiative (ADIE) has co-funded the Greek partner Action Finance Initiative (AFI) to help unemployed people, youth, women and smallholder farmers who want to start or grow their own companies. ADIE provides micro-credits in Greece – a country still reeling from financial crisis. Out of the 46 enterprises supported in 2016, 16 were set up by unemployed people and 72 extra jobs were created, totalling 88 jobs created over the period. AFI has also communicated business advice to almost 700 potential grass-roots entrepreneurs. 112 formal training sessions were organised for 109 micro-entrepreneurs. AFI continues to work with Greek banks to disburse loans to more companies.

Key 2016 achievements

Local Greek partner, the Action Finance Initiative (AFI) funded and supported 46 small enterprises

88 new jobs created

Jumping on the business bandwagon

ADIE – France

Purpose

Proposing a dozen ready-made business themes to spark ideas among would-be entrepreneurs.

ADIE's programme "Micro-franchise solidaire" targets would-be entrepreneurs who lack an idea but want to create their own companies. "Drivers without cars", "small gardening" and "cyclopolitan" are three great ideas that have now been put in motion in France. Trafigura Foundation's contribution covers the R&D and engineering of the project. To date, there are 236 active micro-franchise entrepreneurs, yet ADIE estimates that there is scope for 800 to get on board. Its ambition is to create 3,000-5,000 jobs within a decade. In 2016, ADIE Microfranchise Solidaire supported the creation of 68 new jobs in three areas: gardening and maintenance services; transport, delivery and advertising by tricycle; and at home IT support and training. Other concepts in the pipeline include secretarial services and other repairing services, designed to spark that light-bulb moment in young people.

Key 2016 achievements

68 jobs created

Fighting joblessness among inner city youth

ADIE – France

Purpose

Coaching and training young people from deprived inner-city areas in France.

This “Créajeunes” programme was created in 2007 to fight joblessness in precarious urban areas all over France. The scheme addresses two issues: the strong desire from many youths to create their own business, and their lack of experience. Créajeunes provides urban youth (aged 18-32) with free guidance and the support and training to start their own business. By coaching young people in five-to-six-week terms, followed by a six-month tutoring,

ADIE helps young candidates define and design their project. They then apply to ADIE’s micro-credit and micro-business scheme (in 2016, 20% of candidates received a micro-loan). Créajeunes focuses on growing confidence amongst the young people and offering practical knowledge of the business world.

Key 2016 achievements

1,053 trainees enrolled in 127 sessions throughout France, 41% of participants successfully created their own business

Reaching out to young migrants

Paidos, La FASe – Switzerland

Purpose

Caring for unaccompanied child migrants.

2016 saw an important influx of migrants arriving in Switzerland, among which a worrying number of unaccompanied children. For example, 125 young migrants arrived in October 2015, alone. As a result, these children who have arrived without their families, often do not receive the social and educational support they need before entering the school system.

Trafigura Foundation donates to this programme which integrates isolated children into Geneva’s social fabric and works with institutions that prepare young adults for Genevan state education. Lessons include French, art, sport and cultural excursions. A psychologist is on hand to help them deal with the trauma they have faced. Hundreds of adolescents, aged 15-18, are taken care of by Paidos during the school period and holidays.

Key 2016 achievements

Taking care of 180 child migrants during school periods and during summer holidays

Medical support for migrants

Médecins du Monde – Greece

Purpose

Offering primary healthcare to refugees and migrants arriving at Piraeus Port, Athens.

Newly established clinics in Piraeus port are providing migrants, refugees, uninsured and homeless people with free healthcare. Médecins du Monde (Mdm) Greece has been offering medical services via open polyclinics to ease this humanitarian crisis. It's even working with ferries transporting migrants from the islands, installing a fully equipped Mobile Medical Unit onboard.

In early 2016, Piraeus port was home to approximately 5,000 people. Mdm treated

mostly women and children from Syria and Afghanistan. From April 2016, Mdm started to operate in Schisto refugee camp in the Attica region, caring for over a thousand cases up until the end of the year. There were also two vaccination campaigns – 627 children were vaccinated.

Mdm Greece is running further interventions in Lesbos, Chios, Athens, Thessaloniki, Kavala, Patras and Chania and has extended its activities to Idomeni, Diavata and Tilos.

Key 2016 achievements

Between March 2016 and May 2016, medical teams served 2,813 cases in Piraeus Port, including more than 800 women and almost 600 children

Saving lives at sea

Migrant Offshore Aid Station (MOAS) – Mediterranean Sea, Malta

Purpose

Mitigating loss of life at sea on the world's deadliest migrant routes.

Last year, Trafigura Foundation supported MOAS, which believes no one should die at sea. The Mediterranean is the deadliest migrant crossing in the world, with 75% of migrant deaths occurring here (30,000 deaths by the end of 2015, according to IOM). In recent years the Syrian conflict has increased activity on the Aegean route, with over 1,700 people a day attempting to cross on average. MOAS operates in an area of the Aegean coordinated by JRCC Piraeus (internationally appointed coordination centre) that coordinates rescue vessels. Trafigura Foundation's contribution co-financed

the Aegean mission, which benefited 1,633 people directly, through rescues, assists and emergency relocation.

MOAS continues to advocate the creation of safe and legal routes for people to reach safety. It has loaned its knowledge to high-level conferences and events, demonstrating civic duty in action.

Key 2016 achievements

In 2016 Migrant Offshore Aid Station (MOAS) crews rescued and assisted over 20,000 people fleeing violence, poverty and persecution who were in distress at sea

Sound of joy

Conservatoire Populaire de Musique – Switzerland

Purpose

Allowing children from priority education areas in Geneva to practise a musical instrument.

This wonderful project brings children together to feel the joy of playing music and form an orchestra. They are from lower income neighbourhoods and a high proportion are migrants. The scheme takes place in schools with the aim of fostering integration, cohesion and promote a positive learning climate through the collective practice of music.

By 2016, Orchestre en Classe, run by Conservatoire Populaire, covered seven schools, teaching 14 classes. With Trafigura Foundation's support, since 2010 300 instruments were purchased and are currently in use. Two concerts took place at Victoria Hall in April and June 2016. Since its inception in 2010, the initiative has benefited more than 600 children over a two year period.

Key 2016 achievements

280 students played an instrument bought by the orchestra

Motivating job hunters

CERTIS – Switzerland

Purpose

Identifying 50 beneficiaries per year and providing them with training to re-enter the labour market.

Trafigura Foundation has supported Geneva-based CERTIS for more than three years. Its "Carrefour Formation et Emploi" programme aims to get long-term unemployed people back into jobs via tailor-made coaching as well as connections with recruitment firms. Thanks to the support of the Foundation, CERTIS was able to deliver results that convinced the Hospice General and the Municipality of Meyrin in Geneva to recruit the association as service provider.

Key 2016 achievements

44% "return to work" rate

More than a coffee fix

Old Spike Roastery – UK

Purpose

Social enterprise supporting homeless people in London.

Trafigura Foundation has been helping to finance a commercial coffee roastery that opens in April 2017. It's a coffee house with a difference, since the homeless-turned-baristas are employed to roast and bag the coffee. Our grant went towards buying a new roaster to grow the company.

Last year, Old Spike Roastery allowed homeless people to join the business and completed hospitality courses. This project provides expert training, housing and jobs that will hopefully be a stepping-stone to long term employment.

Key 2016 achievements

Transforming the homeless into baristas and training them in hospitality

A unique film club

International Film Festival and Forum for Human Rights (FIFDH) – Switzerland

Purpose

Educating people on human rights, stimulating debate.

In 2016, an inclusive film festival in Geneva connected migrants with the wider community through a mutual love of cinema. From 4-13 March, four events were organised inside migrant centres (in Anières, Tattes, Feuillassa and Saconnex). 500 people from Geneva met 400 migrants in their shelters to watch films and share time together. This cultural, bridge-building exercise helps to combat racism and prejudice.

Key 2016 achievements

More than 1,000 people participated in events put on by the International Film Festival and Forum for Human Rights (FIFDH)

A vaccine for deadly Ebola

University of Geneva – Switzerland

Purpose

Researching for a vaccine against Ebola virus.

Last year, Trafigura Foundation contributed to co-finance a full time Ph.D. to research for a vaccine against Ebola virus. There is an urgent need to find a protection against Ebola virus. According to scientists, vaccines constitute the best (and currently the

only) defense against the deadly Ebola virus, and the Foundation decided to support the research in this field at the University of Geneva.

Key 2016 achievements

Publication of a scientific article in the journal *Science Translational Medicine*

Ahoy, renewable energy!

Bateau Genève – Switzerland

Purpose

The association aids homeless and marginalised people in Geneva, with free meals, courses to reintegrate into work, and collection of goods and clothes.

In 2016, the Trafigura Foundation financed the revamping project of Bateau Genève's headquarters, a historic steam boat moored on Lake Léman. The Foundation has paid an energy audit aiming at increasing the structure's energy efficiency, installing a solar power system, limiting CO₂ emissions, empowering its thermic isolation and improving ventilation. Disadvantaged people will be the beneficiaries of these improvements to their living conditions.

Key 2016 achievements

Several options were made available to optimise Bateau Genève's energy efficiency

Supporting remote communities in the High Andes

Our programmes in Latin America address two main issues: the socioeconomic development of rural communities, and the violence and social exclusion to which the local youth is exposed in urban areas.

FIC – Peru

Purpose

Implementing projects that promote community development in rural communities in and around Tráfico mining activities.

Fundación Integración Comunitaria (FIC) works to improve quality of life within impoverished communities, towns and settlements in the Andes, Peru. Tráfico offices and operational sites – notably our mining activities are located near these remote areas, so it was natural that we decided to channel our support into the region's development. We chose the trusted local partner FIC to implement four separate projects:

- a mobile health campaign that offers consultations in primary healthcare, and nutritional health;
- "My productive field" which supports local communities with farming, husbandry and irrigation techniques and methods;
- a healthy housing project aimed at improving home habits by installing improved cooking stoves, refrigerators and vegetable patches;
- a primary school in Pampa Galeras, which provides school children with meals, nutritional monitoring and dormitories.

Key 2016 achievements

Thanks to the mobile health campaign, residents of six villages received regular visits from a medical team who assisted over 600 patients and provided nutritional counselling to 345 children

In the programme "My productive field" 129 farming families were able to grow enough to supply the local and regional market, and generate more income

720 improved kitchens and 141 vegetable patches installed by the healthy housing project

The school in Pampa Galeras was equipped with new facilities. The school has grown from one teacher and 12 students to 10 teachers and 65 students

Building pride in the community

Jóvenes Constructores de la Comunidad – Mexico

Purpose

Marginalised youth work on building and renovation initiatives to revive their communities while gaining life skills.

The plan is to train youth aged 16-29 who aren't studying or working, and make them responsible for maintaining public spaces in Mexico City's deprived neighbourhoods. Jóvenes Constructores de la Comunidad, based in Cuauhtémoc Federal District, oversaw the rehabilitation of a local plaza and a public space. Educational activities have ranged from skills for work, technical training and sports workshops, to cultural trips and parental classes. The participants received a monthly economic stimulus to pay for materials

during their training, which concluded with a job and education insertion programme. Encouragingly, out of the 79 men and women involved, 37 went back to school and 22 secured jobs.

Key 2016 achievements

79 young people were trained

22 secured jobs and 37 returned to school

Scoring goals for the greater good

Fundación Carvajal – Colombia

Purpose

Golazo football clubs train youth aged 6-17 reinforcing good values through sport.

Buenaventura port city is plagued by violence and unemployment and is called one of the most violent places in Colombia. In order to fight these problems, the Fundación Carvajal started a football training plan in January 2015, covering five neighbourhoods. The goal is to keep

kids off the streets and further peaceful interaction among members of the community, dealing with topics such as discipline without violence. Seven community members were selected to become trainers in parenting skills. Participation has been excellent – last year, 240 families engaged in community activities and classes. Six young leaders were recruited, taking charge of 12 groups comprising 25 children, enjoying three training sessions per week. Workshops explored the

notions of "responsibility", "solidarity" and "honesty". This year, Golazo continues to transform lives, proving that simply kicking a ball around can foster friendship and respectful coexistence.

Key 2016 achievements

300 young people enrolled are learning civic behaviours by practising football

Stretch that mental muscle

Fight for Peace – Brazil

Purpose

Bestowing fast-track education, qualifications and mentoring on young adults to open the door to jobs.

Careers advice, leadership and employability are a taster of what Brazilians in Rio de Janeiro learn about on Fight for Peace's project. The organisation helps adolescents avoid street gangs and violence in the favelas through sports and education.

Fight for Peace, an organisation using sports as educational vehicles, began New Pathways, a programme that targets youth aged 16-29 living in Maré, a violent favela. "Primary education" fast track courses and

new "support classes" are offered to young people at risk of dropping out from school. Most of the 87 students have completed their studies. They are more positive about the future, feel more ambitious and ready to seek jobs, and parents reported better relationships with their children.

Key 2016 achievements

89% of parents/carers reported their children improved at home and at school

Sustainable employment with no limits

Cascos Verdes – Argentina

Purpose

Investigating how feasible it is to expand Cascos Verdes' education programme for people with disabilities in Chile and Uruguay.

Buenos Aires-based Cascos Verdes has developed a unique four-year education and employability scheme for people with all types of mental disabilities, such as Down's Syndrome. This means access to universities and, once they have qualified as "environmental educators", they can share their knowledge in schools, non-profit organisations or companies. Through this, they gain experience in academic and work places from which they are usually excluded. After eight years of collaboration, the Trófic Foundation sponsored a study to ascertain if and how Cascos Verdes could be implemented in Chile and Uruguay. Responding to requests by peer organisations, Cascos Verdes will explore the specific needs

and opportunities in those countries and define ways to scale-up its outreach.

Key 2016 achievements

A roadmap was designed to create new partnerships in Chile

Buoyed up by music

Fondation Crescendo con la Musica – Mexico

Purpose

Sharing music with poverty-stricken children, by offering them the opportunity to own an instrument and learn music.

Studying classical music and learning to play an instrument helps to develop passion and imagination. Music allows children to see their future in a new light. The Foundation Crescendo con la Musica, created by the professional musician Jorge Viladoms Weber, has started a pilot project to provide access to music to children living in Mexico. The programme enabled the hire of seven music teachers and created classes for five instruments (violin, flute, piano, cello and clarinet) as well as choir singing sessions.

More than 100 instruments were shipped from Switzerland, while others were bought locally. Six music teachers from Switzerland went to Mexico in 2016 to give Master Classes to Mexican teachers.

Key 2016 achievements

360 children benefitted from the programme

Seven music teachers were hired

The key to children's futures

Germinare – Argentina

Purpose

Supporting vulnerable children who have the potential and willingness to follow quality education.

In Argentina, 40% of the young population have not completed secondary education. The public education system is failing the next generation: quality is below the average in Latin American

countries. Trafigura Foundation donated to Germinare to allow low-income children access to better education. Our "Agents for Change" are enrolled into Buenos Aires institutions (private and public) and supported until they get their high school diplomas. Trafigura Foundation currently sponsors two cohorts of 20 kids. One set are in the initial 14-month selection and levelling process – at the end of which at least 13 kids will be accepted into a school. The other group are already in high-quality schools – our grant covers the most vulnerable.

Key 2016 achievements

40 students entered high school and almost all (91%) finished their studies

“Our long-term partnership with Trafigura Foundation has allowed us to constantly improve our job training programme, to adapt to new career paths, and to consistently deliver the highest quality services to young people. The support and leadership shown by Trafigura Foundation have given us the resources to do our job the most effectively and we look forward to continuing through 2017 and beyond.” – Brice White, Trafigura Work & Learn Centre Programme Director.

Youth Empowerment Project – USA

Purpose

Furnishing youth with hard and soft skills training and employment.

The New Orleans region continues to struggle with extremely high rates of youth unemployment, disengagement and a high crime rate. Our dollars are going towards Youth Empowerment Project (YEP), which aims to reduce delinquency and strengthen social inclusion. The overall objective of the Trafigura Work and Learn Center is to provide high-risk youth, aged 16-24, with hard and soft skill training so that they can transition to employment.

We're thrilled to see that graduates are finding formal employment upon programme completion – 41 out of 115 in phase 1. Others have done internships with local businesses. In addition, Design Works, YEP's creative digital media studio, has opened and produced branding and marketing campaigns for a large variety of clients. Another new hot opening is Thrift Works, a youth-run retail resale shop, where pre-loved clothes and goods are sold, while

staff sharpen their customer service skills. 2016 was a successful year, as a record number of young people was connected to jobs and educational opportunities in New Orleans.

Key 2016 achievements

170 students, aged 16-24, benefitted from the YEP training scheme

New Orleans' cultural impetus

NOCCA – USA

Purpose

Providing financial aid to New Orleans Centre for Creative Arts (NOCCA) to fund scholarships and programmes.

The lively NOCCA professional arts training facility is truly one of a kind. It's dedicated to helping young artists of limited means attend the Centre, where they're immersed in classical music, culinary arts, dance, drama, theatre design, visual arts, creative writing and more. Admission is by audition and there is no tuition fee. Trafigura Foundation is a leading supporter of its Financial Aid Programme. Our funding has been put towards exposing pupils to dynamic opportunities, like training with masters on industry-standard equipment and summer study sessions at pre-college programmes. Graduates who had received aid during their time at NOCCA went on to garner over USD 12.5 million in scholarships and aid to go to college. The overall student body earned over USD 22 million in scholarship offers, a USD 151,000 per student average!

Key 2016 achievements

During the 2015-2016 school year, the institute gave USD 190,000 in awards to nearly 200 students

Never giving up

Domus – USA

Purpose

Giving real work experience in business to local youth.

The Trafigura Work & Learn Business Center in Stamford runs an employment program where youth are provided real work experience through working in one of several Domus-based businesses. 2015-2016 saw after-school programmes, summer camps and education at a detention centre, among other activities. Statistics show satisfactory outcomes. 99% showed improvement in technical skills related to the business in which they participated, as measured by pre- and post-testing. 49% had found employment – almost universally their first job ever, by the time they completed their Work & Learn Session. More recently, in 2016, almost all youth referred to the juvenile court diversion programme avoided re-arrest in the six months following project completion. Happily, all the young people on the residential programme (group homes and supervised apartment living) graduated from high school and went on to college or a vocational course. High-risk American youths are on a path to independence.

Key 2016 achievements

98% of 115 participants successfully completed the programme
